

What is Pollinator Pathways New Hampshire?

We are an organization of individuals working to connect pollinators with the habitat they need to survive.

Pollinators are in severe decline and need your help.

With more than a dozen New Hampshire "partner towns" on board, Pollinator Pathways NH is rapidly growing! Please join us in promoting native habitat across New Hampshire. This natural habitat attracts pollinators, birds, other wildlife, and supports biodiversity.

How Can You Help?

Plant native plants

Mow lawns less

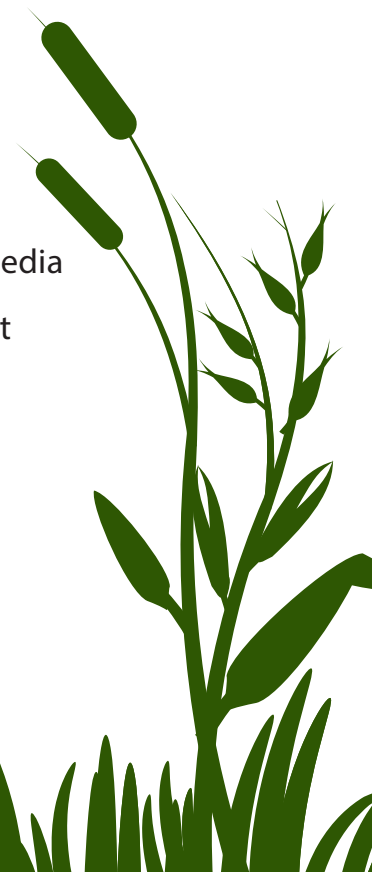

0% pesticide use

Educate your local community

Join programs, resources & social media

Host a Pollinator Pathways NH event

*Restoring Habitat
One Yard at a Time*
